

Electronic Visit Verification (EVV) in Massachusetts

Stakeholder Dialogue Session #8

Mystic Valley Elder Services – Malden, MA

December 6, 2019

Agenda

- » **EVV Overview and EVV Stakeholder Engagement**

- » Areas for Discussion

- » MyTimesheet Topics for Review
 - » Scheduling Console

- » Next Steps

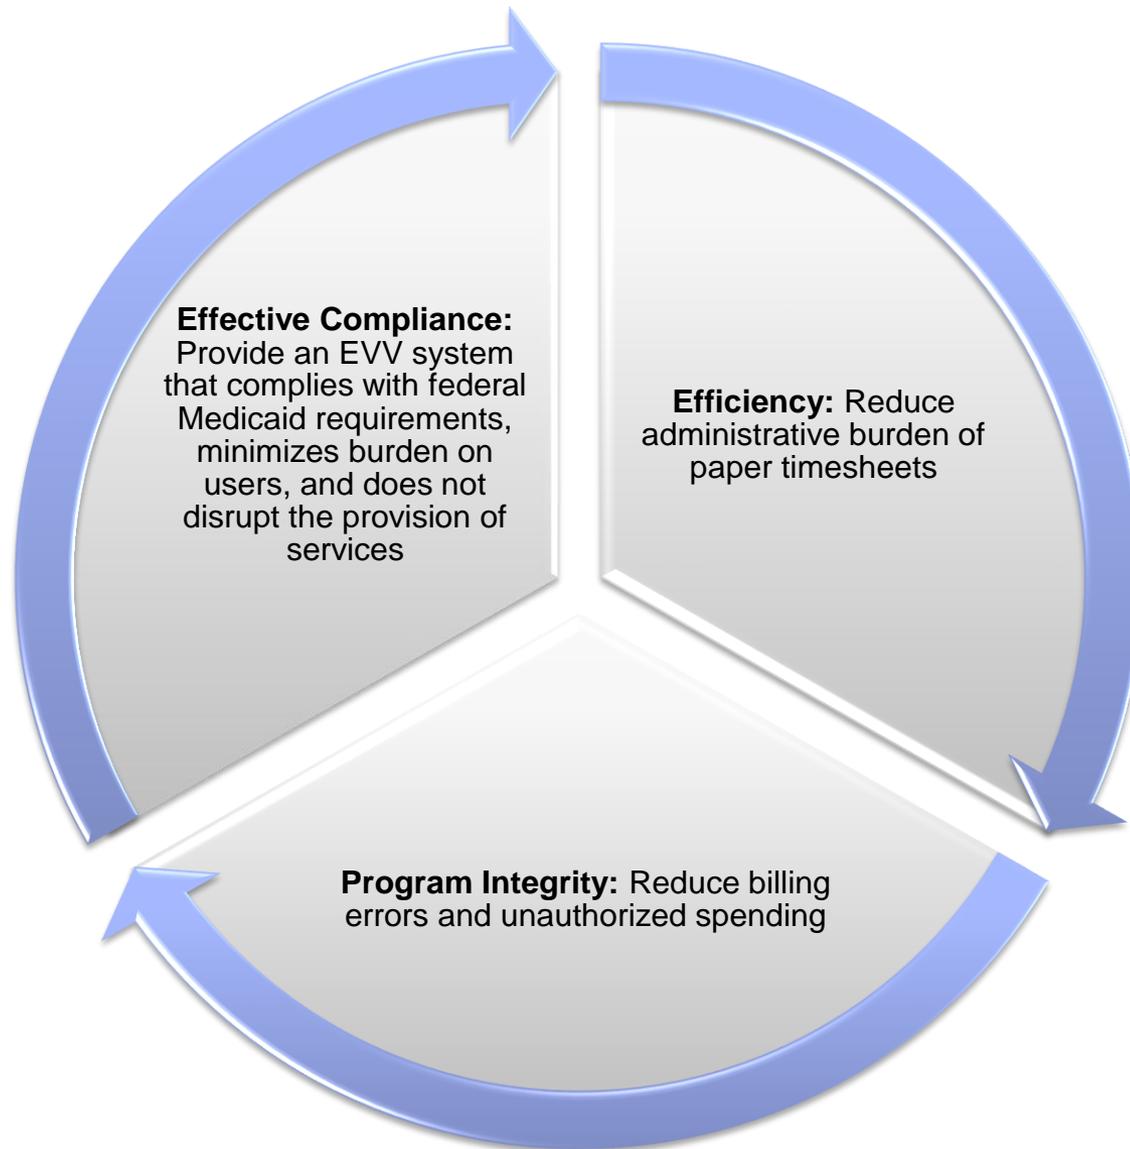

Terms Used in Today's Session

- **Alternate EVV or Alt. EVV** – Refers to EVV systems used by provider agencies that are NOT using the MyTimesheet EVV System. These are “Alternate” EVV systems.
- **Data Aggregator** – System that combines or “aggregates” EVV data from provider agencies. Provider agencies using Alt. EVV systems will send their EVV data to Optum’s data aggregator. MyTimesheet data will also flow into the data aggregator.
- **Electronic Visit Verification (EVV)** - refers to the technology a worker uses during a home visit to capture information about the services provided
- **MyTimesheet** – Optum’s EVV system that can be used by provider agencies to collect EVV data
- **Optum** – Vendor that EOHHS selected to provide the MyTimesheet & Data Aggregator EVV Systems.

21st Century Cures Act Mandates EVV Use

- Massachusetts is implementing EVV as mandated by the 21st Century Cures Act (federal law) for the following Medicaid Services:
 - Personal care by January 1, 2020
 - Home health by January 1, 2023
- Massachusetts submitted a Good Faith Effort Application to CMS on November 15, 2019, which would provide the state with an additional year to comply with EVV requirements
- EOEA is electing to require EVV for some non-Medicaid services (Home Care Program) as well to simplify data collection on the worker level
- EVV use is not required for organizations that provide only companion services and/or only adult day services

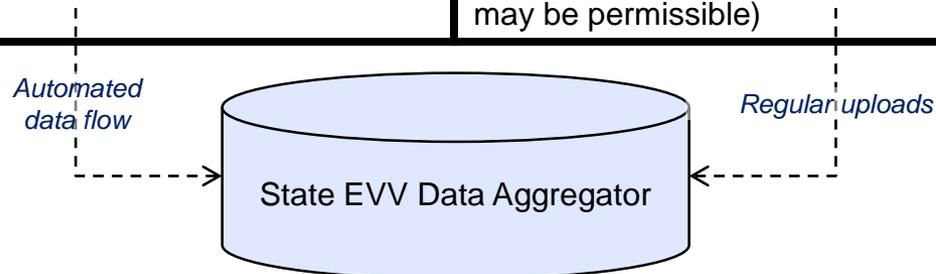

Massachusetts' goals for EVV implementation

EOHHS Deploying a Hybrid EVV model for ASAP Contracted Providers

EVV Options for ASAP-contracted providers

	MyTimesheet <i>State-sponsored system developed by Optum</i>	Alternate EVV systems <i>Any system purchased by providers that meets Cures Act and EOHHS requirements</i>
Providers served	Any ASAP-contracted provider	Providers with existing EVV systems in place or those who choose to adopt one
Software platform cost	Free use of platform (devices not included)	Depends on vendor charge
Vendor	Optum (contracted by MassHealth)	Numerous EVV products already in use
Functionality	<ul style="list-style-type: none"> GPS check-in & check-out on mobile devices Web-based portal for provider organizations and ASAPs 	Must provide data elements meeting Cures Act and EOHHS requirements, but can include additional features (varying check in methods may be permissible)

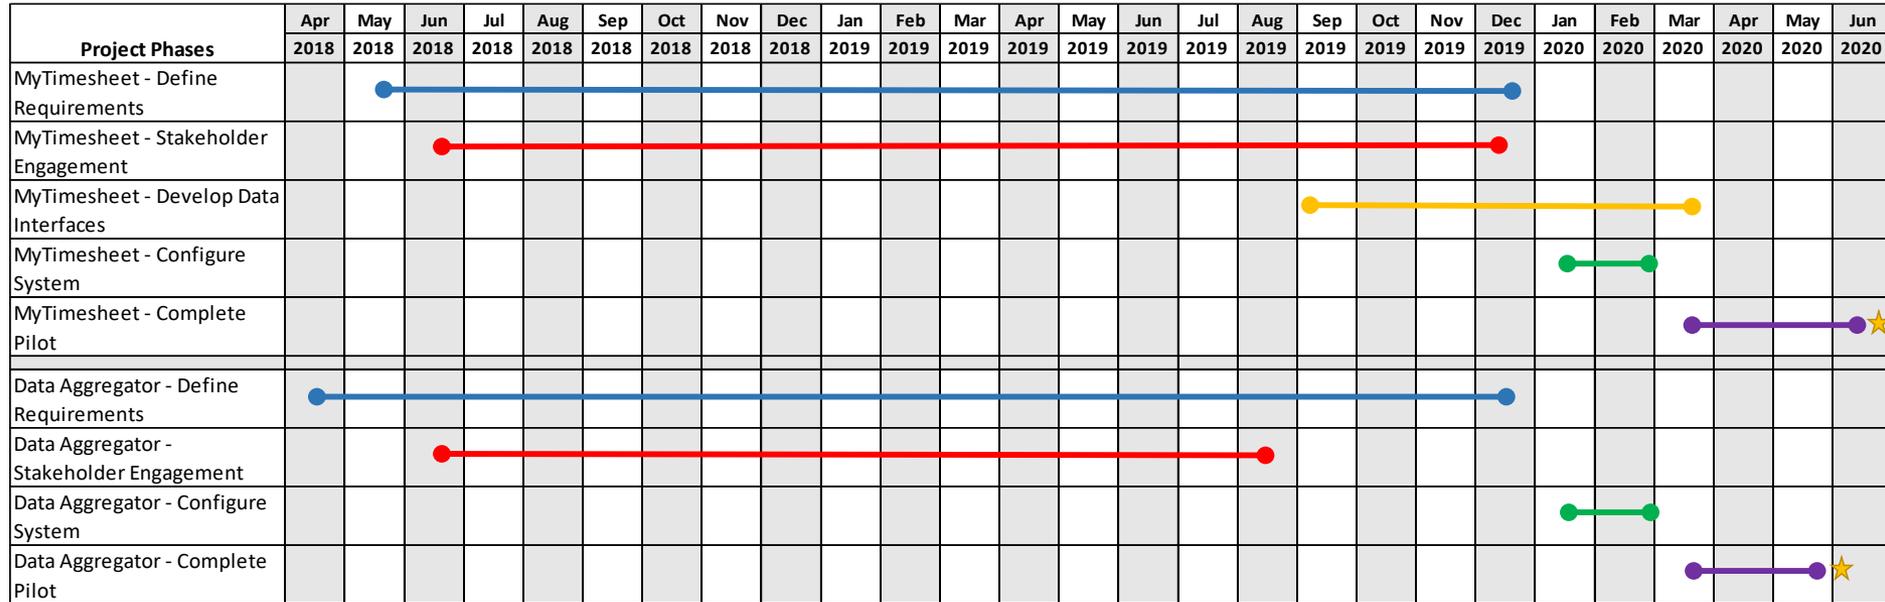

MyTimesheet Functionality

MyTimesheet Features	MyTimesheet Limitations
Configured for general use among the ASAP-provider network	Does not take the place of existing software used for the scheduling of non-EOHHS members
Captures EVV data for personal care services for EOE/MassHealth recipients on the Frail Elder Waiver and the Home Care Program	Does not take the place of existing software used for payroll responsibilities
Free to all provider organizations (devices not included)	Not customized for individual provider organizations

Estimated EVV Implementation Timeline for ASAP Network

Now
↓

Objective of Dialogue Sessions

- Obtain feedback from provider agencies on different aspects of EVV
 - Ensure that EOHHS and Optum are on the right track before system is developed and plans are finalized
 - Identify any possible system or policy changes based on feedback
 - Engage with all stakeholders across the Commonwealth, not just those who are located in the Metro-Boston area
 - Facilitate relationships between EOHHS, Optum, EOEA and provider agencies
- Clarify programs that require EVV
 - Frail Elder Waiver, Home Care Program, Senior Care Options (SCO), One Care
- Address a broad range of topics
 - Each session has addressed a different topic related to the two EVV options (MyTimesheet and Alt-EVV)
 - Supplement with other modes of education and input including stakeholder surveys and MassHealth webpage updates

Discussion: Billing Extract Report

The Billing Extract Report is a report that will support providers who elect to use MyTimesheet in entering data into Provider Direct. This report **will not** replace current Provider Direct processes.

The report will include:

- Provider organization name & EIN
- Associated ASAP
- Consumer Name and ID(s)
- Worker Name and ID
- Service Address
- Service Description
- Service Date
- Service Start and End Time
- Actual Service Duration and Rounded Service Duration

What other data is important to include?

Discussion: Current Practices

For All Provider Organizations

- Does your organization provide email addresses for your workers?
- If you are a provider organization with multiple locations, how do you handle scheduling across multiple offices? How does your scheduling system accommodate this practice?
 - For example, do you have schedulers covering specific offices or service locations?
 - How is coverage handled (i.e. if a scheduler is covering for another office or a worker is covering a case temporarily at another location)?

For Alt-EVV Users

- How do you have your workers check in and check out for multiple services in a visit?
- If you have your workers check in and out only once when you have multiple services provided in a single visit, how does your organization handle billing those services?

Scheduling Console Overview

MyTimesheet

Rhonda Messerschmidt

Overview of MyTimesheet Scheduling Data Flow

- The flow chart below illustrates how data flows from EOEA and EOHHS to Optum for scheduling in the MyTimesheet EVV system
- EOHHS and Optum will have an automatic data transfer process in place that sends the Service Authorization data from SAMs to MyTimesheet.

Scheduler Responsibilities in MyTimesheet

A Scheduler at a Provider Organization may use MyTimesheet to complete the following activities:

- **Complete intake review of the service authorizations**
- Schedule appointments
- Review and respond to worker notifications related to scheduling
- Resolve scheduling issues
- Run scheduling reports

Intake Review of Service Authorizations

- MyTimesheet offers Provider Organizations the ability to view the service authorizations that are transferred from SAMS to MyTimesheet during the automatic data transfer process.
- The service authorization data will be used to generate the MyTimesheet Service Plan for the consumer.
- Once the MyTimesheet Service Plan is created, the consumer's schedule can be set up in the MyTimesheet system.

The screenshot shows the Salesforce MyTimesheet EVV interface. At the top, there is a navigation bar with the MyTimesheet EVV logo and a 'Service Orders' dropdown menu. Below this, a section titled 'New Service Orders Created from Service Authorizations' is displayed, showing 5 items sorted by Work Order Number. The table below contains the following data:

	Work Order Num...	Account	Service Territory	Subject	Service Auth	Service Auth Number	Units Appr...
1	00000351	StephanieOrtiz	Provider Org. 1	Stephanie Health Help	RE-0005	4567890	200
2	00000361	Angie Houston	Provider Org. 1	Maintenance Plan	RE-0007	4567890	200
3	00000364	Tate Caleb	Provider Org. 1	Diagnosis	RE-0008	4567890	200
4	00000368	Aaron Rodgers	Provider Org. 1	Diagnosis	RE-0009	456778	200
5	00000408	Lesser Messer	Provider Org. 1	Maintenance Plan	RE-0009	456778	200

Scheduler Responsibilities in MyTimesheet

A Scheduler at a Provider Organization may use MyTimesheet to complete the following activities:

- Complete intake review of the service authorizations
- **Schedule appointments**
- Review and respond to worker notifications related to scheduling
- Resolve scheduling issues
- Run scheduling reports

Scheduling Appointments

- Once MyTimesheet has the service authorization information from the data transfer, the Scheduler can create the appointments in MyTimesheet.
- Scheduling appointments is done in MyTimesheet by creating what is called a “Service Plan”.
- A Service Plan is information about a specific service being delivered, the time frames, and frequency. It is based on the service authorization.
- Much of the information needed to complete the Service Plan will be automatically populated by the service authorization. Some data may be populated by the scheduler, depending on the business practice of the provider organization and the level of detail provided in the service authorization.

The screenshot shows a web form titled "Service Plan" with two main sections: "General Information" and "Information specific to this Service Plan".

General Information:

- Account: Rita Messer
- Service Order: 00000361
- Service Plan Title: Rita's Daily Assistance Plan
- Description: Personal Care Services are needed.
- * Start Date: 01/01/2019
- End Date: 12/31/2019

Information specific to this Service Plan:

- * Address Type: Primary
- Consumer Preferred Hours: 8:00 AM - 5:00 PM EST
- Service Code: Personal Care
- Consumer Contact: Les Messer

At the bottom, there are three buttons: "Cancel", "Save & New", and "Save".

Scheduling Appointments

Gantt Chart: provides a visual representation of a worker's appointments and their status over a period of time.

The screenshot displays the EVV MyTimesheet interface. On the left, the **Appointment Inventory Pane** (highlighted in red) shows a list of service appointments with columns for Appointment ID, Territory ID, Status, and Earliest Start Time. The list includes appointments for SA-2680, SA-2223, SA-4060, SA-4139, SA-4164, and SA-4136, all scheduled for 12:00 AM on various dates in August 2019. On the right, the **Gantt Chart Pane** (highlighted in green) shows a Gantt chart for 'Provider Org. 1' on Tuesday, August 27, 2019. The chart displays appointment bars for several workers: Suzanne Crane, Robyn Ballard, Anar Aliyev, Rhonda Messerschmidt, Rob Ball, and Ana Ali. The bars are color-coded according to their status: yellow for Scheduled, purple for In Progress, green for Completed, and blue for Dispatched. A coffee cup icon indicates a break. The chart also shows a utilization rate of 47% for the provider organization.

★ Once a Service Plan is created, the appointments populate on the Appointment Inventory Pane and the Gantt Chart Pane of MyTimesheet.

Appointment Status Legend

	Scheduled		Dispatched		Break
	In Progress		Completed		

Scheduling Appointments

The screenshot shows the 'EVV MyTimesheet' interface. At the top, there's a 'Policy: EVV' dropdown. Below that, it says 'All Service Appointments'. There are filters for 'Horizon: 08/29/2019' and a 'Match Gantt Dates' checkbox. A status indicator shows '1-75 of 126, 0 selected'. There are 'Schedule' and 'Dispatch' buttons. A search bar is labeled 'Search Service Appointment...'. Below is a table with columns: 'APPOINTMEN...', 'TERRITORY ID', 'STATUS', and 'EARLIEST START PERM...'. The table lists several appointments with their IDs, territory IDs, statuses, and start dates. A red callout box points to the 'Appointment Inventory Pane' title.

APPOINTMEN...	TERRITORY ID	STATUS	EARLIEST START PERM...
SA-2680	Provider Org. 1	Scheduled	8/12/2019 12:00 AM
SA-2223	Provider Org. 1	Completed	8/13/2019 12:00 AM
SA-4060	Provider Org. 1	Dispatched	8/16/2019 12:00 AM
SA-4139	Provider Org. 1	Scheduled	8/15/2019 12:00 AM
SA-4164	Provider Org. 1	Scheduled	8/15/2019 12:00 AM
SA-4136	Provider Org. 1	Scheduled	8/15/2019 12:00 AM

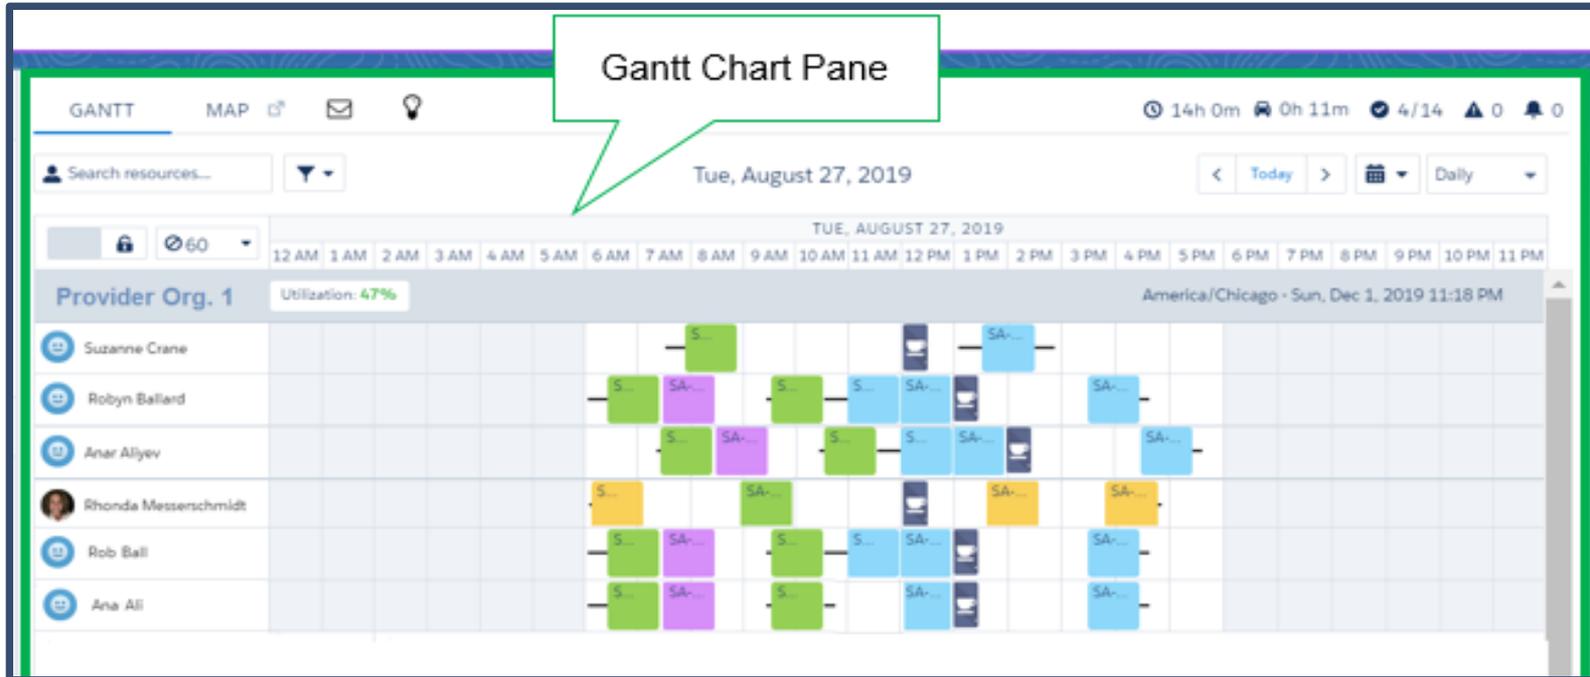

The Appointment Inventory Pane contains all of the service appointments in a list format. These appointments were created from Service Plans with information from the Service Authorizations

You can use the appointment inventory pane to:

- View the list of appointments that need to be scheduled
- View the list of appointments that have been scheduled that are ready to be dispatched
- View the status for any listed service appointments
- Choose the criteria that you want applied to appointments in order for them to be listed
- Set the date range for the appointments you want included in the list

Scheduling Appointments

The Gantt Chart Pane contains a view of all appointments that have been scheduled, dispatched, in-progress or completed.

Appointment Status Legend			
	Scheduled		Completed
	In Progress		Break
	Dispatched		

Actions you can take using the Gantt chart pane include:

- View the current status and details of in-progress appointments
- Identify scheduling conflicts
- Move appointments from one worker to another worker
- Schedule and dispatch appointments
- Change appointment status
- Flag appointments
- Reschedule appointments

Scheduling Appointments

To Schedule Appointments:

- Select the appointments that need to be scheduled from the Appointment Inventory Pane.
- Appointments that need to be scheduled they are identified with the Status “None”.
- Click the radio button to the left to select the appointments you want to schedule and then select “Schedule.”
- The system will recommend a worker to deliver the service, in the timeframe and frequency needed by the consumer or the scheduler can pick a worker based on their availability.

Policy: EVV

All Service Appointments

Horizon: 11/30/2019 Match Gantt Dates

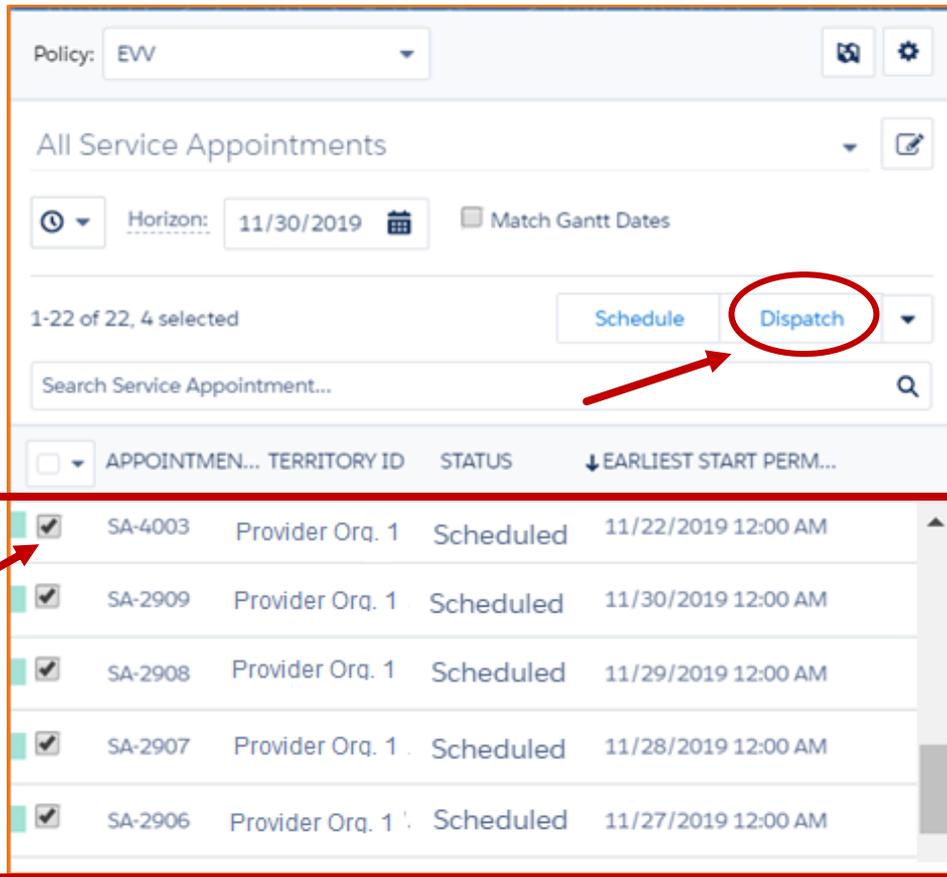

1-22 of 22, 4 selected

Search Service Appointment...

<input type="checkbox"/>	APPOINTMEN...	TERRITORY ID	STATUS	↓ EARLIEST START PERM...
<input checked="" type="checkbox"/>	SA-4003	Provider Orq. 1	None	11/22/2019 12:00 AM
<input checked="" type="checkbox"/>	SA-2909	Provider Orq. 1	None	11/30/2019 12:00 AM
<input checked="" type="checkbox"/>	SA-2908	Provider Orq. 1	None	11/29/2019 12:00 AM
<input checked="" type="checkbox"/>	SA-2907	Provider Orq. 1	None	11/28/2019 12:00 AM
<input checked="" type="checkbox"/>	SA-2906	Provider Orq. 1	None	11/27/2019 12:00 AM

Dispatching Appointments

Dispatch: an action taken by the Scheduler that pushes the scheduled appointment to the worker's mobile app.

The screenshot displays the Optum Scheduler interface. At the top, the 'Policy' is set to 'EVV'. Below this, the 'All Service Appointments' section is visible, including a 'Horizon' of '11/30/2019' and a 'Match Gantt Dates' checkbox. A table of appointments is shown with columns for 'APPOINTMEN...', 'TERRITORY ID', 'STATUS', and '↓EARLIEST START PERM...'. The first five rows are selected, indicated by checkmarks in the left margin. A red box highlights the first five rows of the table. A red arrow points to the 'Dispatch' button in the top right of the table area. Another red arrow points to the first row of the table. A blue star icon is positioned to the right of the table.

	APPOINTMEN...	TERRITORY ID	STATUS	↓EARLIEST START PERM...
<input checked="" type="checkbox"/>	SA-4003	Provider Orq. 1	Scheduled	11/22/2019 12:00 AM
<input checked="" type="checkbox"/>	SA-2909	Provider Orq. 1	Scheduled	11/30/2019 12:00 AM
<input checked="" type="checkbox"/>	SA-2908	Provider Orq. 1	Scheduled	11/29/2019 12:00 AM
<input checked="" type="checkbox"/>	SA-2907	Provider Orq. 1	Scheduled	11/28/2019 12:00 AM
<input checked="" type="checkbox"/>	SA-2906	Provider Orq. 1	Scheduled	11/27/2019 12:00 AM

To Dispatch Appointments:

- Select the appointments that need to be dispatched from the Appointment Inventory Pane.
- They are identified with the Status of "Schedule".
- Click the radio button to the left to select the appointments you want to dispatch and then select "Dispatch."
- The status will change from scheduled to dispatched.
- The system will push that appointment to the worker's mobile app.

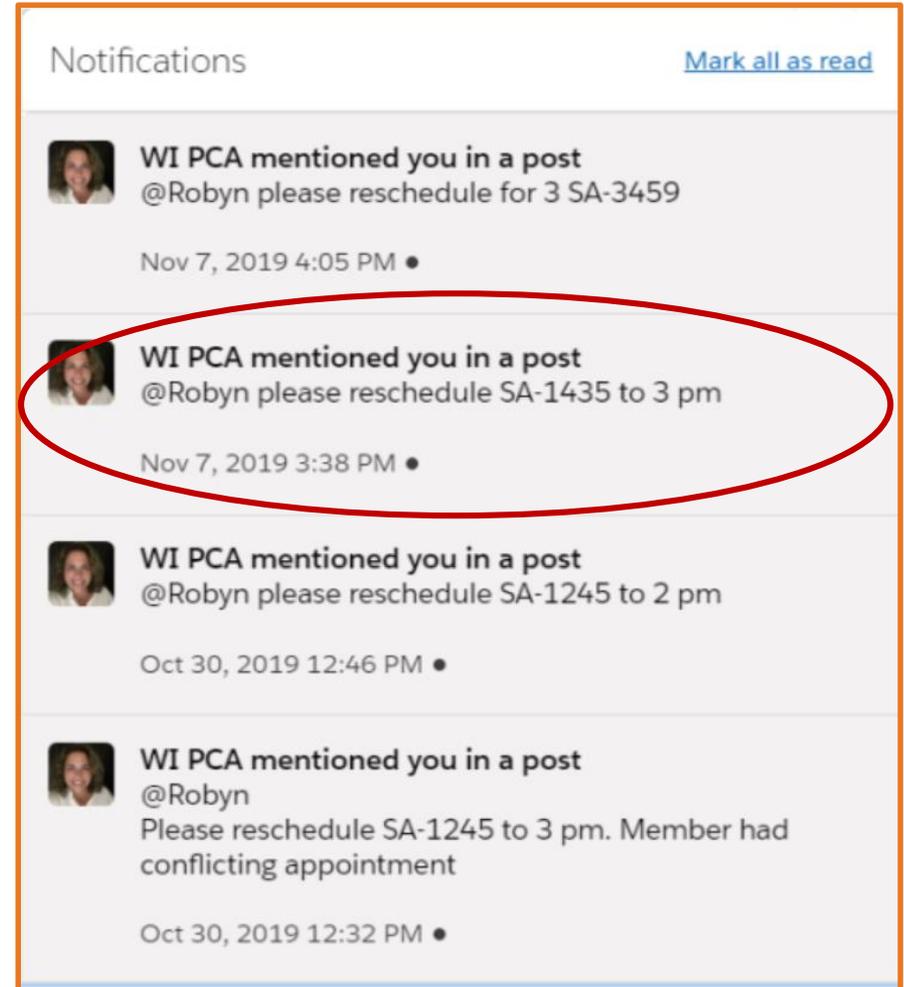

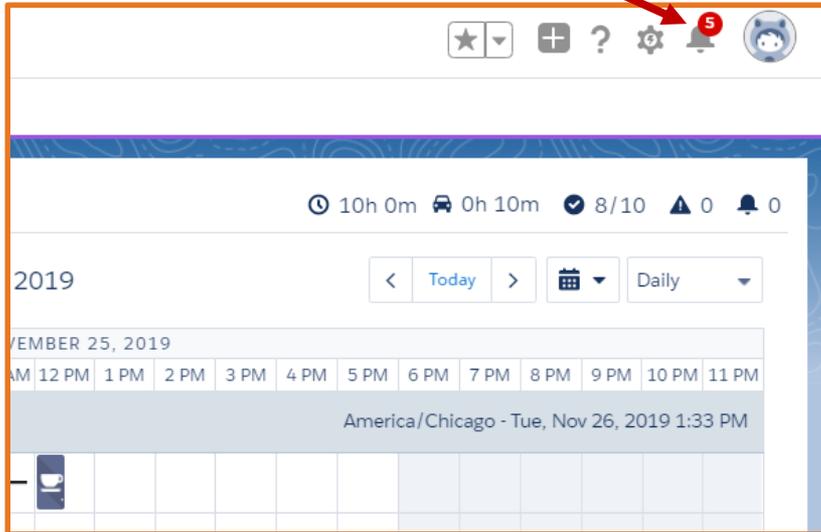

Scheduler Responsibilities in MyTimesheet

A Scheduler at a Provider Organization may use MyTimesheet to complete the following activities:

- Complete intake review of the service authorizations
- Schedule appointments
- **Review and respond to worker notifications related to scheduling**
- Resolve scheduling issues
- Run scheduling reports

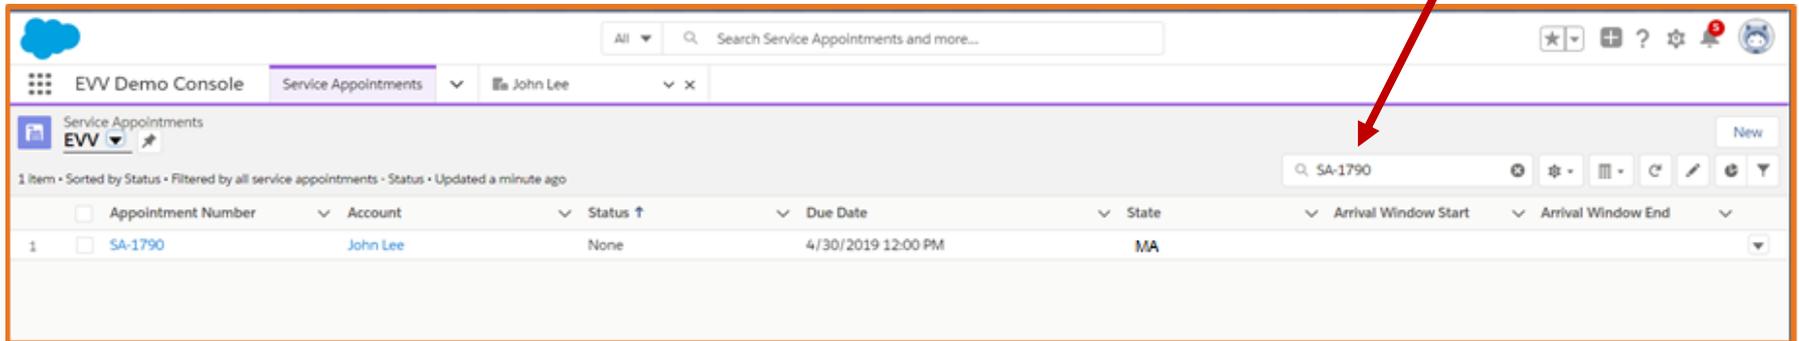

Worker Notifications Related to Scheduling

- The Scheduler can receive notifications on the scheduling console from the Workers out in the field. 
- These notifications are sent from the Mobile App through a chatter message.
- The Scheduler clicks on a notification to open it. This enables the Scheduler to respond to the Worker and communicate in real-time.

Resolving Scheduling Issues

- In lieu of the of the Chatter functionality the worker can call the scheduler with the Service appointment number (SA-1790) and the Scheduler can search for that Service Appointment in the search box to update the details based on their conversation.

The screenshot displays the EVV Demo Console interface. At the top, there is a search bar with the text "Search Service Appointments and more...". Below this, the "Service Appointments" tab is active, and the user "John Lee" is logged in. A search box on the right contains the text "SA-1790", with a red arrow pointing to it. Below the search bar, a table lists the search results. The table has columns for Appointment Number, Account, Status, Due Date, State, Arrival Window Start, and Arrival Window End. One result is shown: SA-1790, John Lee, None, 4/30/2019 12:00 PM, MA.

Appointment Number	Account	Status	Due Date	State	Arrival Window Start	Arrival Window End
SA-1790	John Lee	None	4/30/2019 12:00 PM	MA		

Scheduler Responsibilities in MyTimesheet

A Scheduler at a Provider Organization may use MyTimesheet to complete the following activities:

- Complete intake review of the service authorizations
- Schedule appointments
- Review and respond to worker notifications related to scheduling
- **Resolve scheduling issues**
- Run scheduling reports

To go to the report library, click the down arrow to open the menu of options

Select Reports

Running Scheduling Reports

The screenshot shows the Salesforce Reports interface. At the top, there is a search bar labeled "Search Salesforce" and a navigation menu with "MyTimesheet" and "Reports" tabs. Below the navigation, the breadcrumb path is "Reports > EVV Reports > MyTimesheet Reports". A search bar "Search all folders..." and a "New Report" button are also visible. The main content is a table of reports with the following data:

REPORTS	Name	Description
Recent	Accepted Scheduled Appointments	Service Appointments with None / Scheduled Status but not Dispatched
Created by Me	MA EVV Accepted Scheduled	Identifies all of the appointments that have been accepted by the worker and dispatched to their mobile application
	MA Late Visits	Identifies visits where the worker has checked-in late
Private Reports	MA Service Appointment w/o Service Auth	Identifies service appointments in the system that do not have a prior authorization associated with them
Public Reports	Check-in and out to Actual Schedule Rpt.	Shows by agency and by resource, Service appointments where the scheduled time and the actual time are not aligned.

In the report library for MyTimesheet, click on the report you'd like to run. For every report, there is a description of what that report contains. The report parameters are pre-set; however, they can be modified with the right set of user permissions.
